Visitor Access Policy

Policy ID:	GVC-VIS-004	Version:	1.0
Effective Date:	1 January 2026	Review Date:	1 January 2027
Document Status:	Active	Hospital:	Green Valley Community Hospital

Purpose

This policy explains the rules for visitors at Green Valley Community Hospital, including visiting hours, visitor limits, and how visitor passes work. The goal is to keep the hospital comfortable and safe for patients while allowing family and friends to visit.

A calm and predictable visiting environment helps patients rest and recover, while also making it easier for hospital staff to move through wards and provide care without unnecessary interruption.

Scope

This policy applies to all visitors entering patient care areas of Green Valley Community Hospital, including inpatient wards and the Intensive Care Unit.

It does not apply to hospital staff, contractors, or delivery personnel, who follow separate internal access procedures managed by the administrative office.

General Visiting Hours

General visiting hours are from 8:00 AM to 8:00 PM every day. Visitors are asked to arrive within these hours so that patients have enough time to rest between visits.

Outside of general visiting hours, access to patient care areas is limited to registered family members providing overnight support, where this has been arranged with ward staff in advance.

Visitor Registration and Identification

All visitors should register at the security desk near the main entrance before proceeding to a patient's room. Visitor registration involves recording the visitor's name and the name of the patient they are visiting.

Visitor identification: a valid identification document should be shown when requested, either at registration or when asked by security staff inside the hospital.

Visitor Passes

A visitor pass is required for inpatient visitors. After registering at the security desk, each visitor receives a printed visitor pass, which should be worn or carried visibly while inside the hospital.

Visitor passes are valid for the day they are issued. Visitors planning to return on a different day should register again and collect a new pass.

Maximum Visitors and Visitor Limits

Maximum visitors: 2 visitors per patient at one time. This limit helps keep patient rooms comfortable and allows hospital staff to move freely while providing care.

Area	Visitor Limit at One Time
General inpatient ward	2 visitors per patient
Intensive Care Unit (ICU)	1 visitor per patient, for short periods
Outpatient waiting areas	No strict limit, but visitors should keep walkways clear

Children Visiting

Children are welcome to visit during general visiting hours when accompanied by an adult. Because hospital environments can be unfamiliar to young children, parents and guardians are asked to supervise children closely and to keep visits brief if a child becomes restless or unwell themselves.

ICU Access and Restricted Areas

The Intensive Care Unit has more limited visiting arrangements than the general wards because patients there need extra rest and close monitoring. ICU visits are generally shorter and limited to one visitor at a time, coordinated with ward staff.

Some areas of the hospital, such as staff-only corridors and equipment rooms, are restricted areas and are not open to visitors at any time. Signs mark these areas, and visitors should follow posted instructions.

Quiet Hours and Visitor Conduct

Quiet hours are observed between 9:00 PM and 7:00 AM, even for visitors who have arranged overnight support. During quiet hours, conversations and phone calls should be kept low in volume so other patients are not disturbed.

Visitors are expected to behave respectfully toward patients, staff, and other visitors, and to follow instructions from hospital staff and security personnel at all times.

Lost Visitor Passes

If a visitor pass is lost during a visit, the visitor should report this to the security desk immediately. A replacement pass can usually be issued after confirming the visitor's identity and the patient they are visiting.

Visiting Exceptions

In certain situations, such as end-of-life care or a patient's urgent need for family support, ward staff may allow flexibility in visiting hours or visitor limits. These exceptions are decided case by case in coordination with the nursing staff on duty.

Security Desk

The security desk is the main point of contact for all visitor-related questions. It is staffed at all times and can help with visitor registration, replacement passes, and directions within the hospital.

Frequently Asked Practical Situations

Beyond the standard rules above, visitors sometimes ask about everyday situations that are not covered by a single specific rule. The guidance below is meant to help in these common cases.

- Visitors bringing food or personal items for a patient should check with ward staff first, in case of any dietary considerations.
- Large groups of visitors should take turns rather than gathering together in a patient's room, to stay within the visitor limit.
- Visitors who need to step out briefly, for example to make a phone call, do not need to re-register if they return the same day and still have their visitor pass.
- Visitors bringing flowers or gifts should check with ward staff about any restrictions that may apply in certain wards.

Responsibilities

Security and Visitor Services staff are responsible for registering visitors, issuing visitor passes, and enforcing visitor limits. Visitors are responsible for carrying valid identification, wearing their visitor pass, and following hospital rules during their visit.

Ward staff share responsibility for visitor comfort and safety within their specific ward, including deciding when a shorter or adjusted visit is appropriate for a particular patient's wellbeing.

Exceptions

Exceptions to visiting hours or visitor limits may be granted by ward staff for specific situations, such as when a patient needs extra family support. These exceptions are not automatic and should be discussed with the nursing staff in advance where possible.

Frequently Asked Questions

Q: What are the general visiting hours?

A: General visiting hours are from 8:00 AM to 8:00 PM every day.

Q: How many visitors are allowed at one time?

A: A maximum of two visitors may visit a patient at one time in the general ward, and one visitor at a time in the Intensive Care Unit.

Q: Is visitor identification required?

A: Yes. A valid identification document should be shown when requested at registration or by security staff.

Q: What should a visitor do at the security desk?

A: Visitors should register with their name and the name of the patient they are visiting, and collect a visitor pass before proceeding to the patient's room.

Q: Can children visit patients?

A: Yes, during general visiting hours, when accompanied and supervised by an adult.

Q: What should I do if I lose my visitor pass?

A: Report the lost pass to the security desk immediately, so a replacement can be issued after confirming your identity.
