

Green Valley Community Hospital

Discharge Coordination Office

Discharge Process Policy

Policy ID:	GVC-DIS-005	Version:	1.0
Effective Date:	1 January 2026	Review Date:	1 January 2027
Document Status:	Active	Hospital:	Green Valley Community Hospital

Purpose

This policy describes the administrative steps a patient completes when leaving Green Valley Community Hospital after inpatient care. It focuses on administrative tasks, such as billing and document collection, and does not provide medical treatment instructions.

The goal of this policy is to make the discharge process predictable, so that patients and families know what to expect and can plan ahead for the final steps of a hospital stay.

Scope

This policy applies to all inpatients being discharged from Green Valley Community Hospital, and to family members assisting with the discharge process.

It covers administrative discharge steps only. Any instructions about ongoing care after leaving the hospital are provided separately by the treating department and are not part of this administrative policy.

Discharge Request

A discharge request is typically initiated by the treating department once care is complete. The Discharge Coordination Office is then notified and begins preparing the administrative steps needed before the patient can leave.

Discharge Preparation Steps

Before leaving, patients should complete the following steps.

- 1 Complete final billing requirements at the billing desk.
- 2 Collect available discharge documents from the Discharge Coordination Office.
- 3 Confirm that personal belongings have been collected from the room.
- 4 Complete any required administrative signatures.

These steps are usually completed in coordination with ward staff, the billing desk, and, where relevant, the Insurance Desk.

Final Billing and Insurance Coordination

The final bill is prepared once treatment is complete and discharge has been approved, as described in the Billing and Payment Policy. If the patient used a cashless insurance request, the Discharge Coordination Office confirms with the Insurance Desk that coverage details have been finalized before the

final bill is issued.

If insurance approval or final billing is still pending, discharge may be temporarily delayed. See the Discharge Delays section below for more information.

Document Collection and Discharge Summary

Before leaving, patients receive a discharge summary, which is an administrative document summarizing the dates of their stay and general administrative details. It is not a detailed medical record, and patients who need a copy of their broader administrative record should refer to the Patient Records Policy.

Patients should also collect any receipts, billing statements, or insurance documents prepared during their stay, as these may be useful for personal records or future insurance claims.

Property Check and Room Clearance

Before leaving the room, patients and family members should check that all personal belongings, such as clothing, personal items, and chargers, have been collected. Ward staff will perform a basic room clearance check together with the patient or a family member.

Patient Confirmation and Administrative Signatures

As a final step, the patient or an authorized family member signs a discharge confirmation form. This form confirms that the patient has been informed of their discharge, has received available discharge documents, and has completed the property check.

Transport Arrangements

Patients are responsible for arranging their own transport home unless other arrangements have been made in advance. The Discharge Coordination Office can provide general information about nearby transport options if requested, but does not arrange transport directly.

Discharge Delays

Discharge may be delayed if final billing, insurance approval, or required documents are still being processed. When a delay occurs, the Discharge Coordination Office keeps the patient and family informed of the expected timeline and works with the billing desk and Insurance Desk to resolve outstanding items as quickly as possible.

Family Responsibilities

Family members assisting with discharge are expected to help with collecting personal belongings, confirming administrative details, and, where needed, arranging transport home for the patient.

Post-Discharge Administrative Contact

After discharge, patients or family members with administrative questions, such as a request for an additional copy of a receipt or discharge summary, can contact the Administrative Services Desk.

Typical Discharge Timeline

While every stay is different, the table below gives a general sense of how discharge-related steps typically unfold once the treating department confirms a patient is ready to leave.

Step	Typical Timing
Discharge request initiated	Once treatment is complete
Final billing prepared	Usually within a few hours of the request
Discharge documents collected	Same day, at the Discharge Coordination Office
Property check and room clearance	Just before leaving the room
Discharge confirmation signed	Final step before leaving the hospital

Responsibilities

The Discharge Coordination Office is responsible for preparing discharge documents and coordinating with the billing desk and Insurance Desk. Patients and family members are responsible for completing the property check and administrative signatures before leaving.

Ward staff also play a role in discharge by confirming that a patient's room and belongings are ready to be checked, and by notifying the Discharge Coordination Office when a patient is prepared to begin the final administrative steps.

Clear coordination between these groups helps avoid unnecessary waiting on the day of discharge, since billing, insurance, and room clearance can often be prepared in parallel rather than one after another.

Exceptions

In some cases, a patient may need to leave before all administrative steps are complete, for example due to an urgent personal matter. In these cases, the Discharge Coordination Office will note the outstanding steps and follow up with the patient afterward to complete them.

Patients transferring to another facility follow a modified discharge process, where the Discharge Coordination Office prepares a shorter set of administrative documents suited to a transfer rather than a full return home, while final billing and insurance coordination continue as usual.

Frequently Asked Questions

Q: What should be completed before discharge?

A: Patients should complete final billing, collect available discharge documents, confirm personal belongings have been collected, and complete required administrative signatures.

Q: What documents are provided during discharge?

A: Patients receive a discharge summary along with any receipts, billing statements, or insurance documents prepared during their stay.

Q: What happens after a patient is discharged?

A: The patient completes the property check and signs a discharge confirmation form, then leaves the hospital; any remaining administrative questions can be directed to the Administrative Services Desk afterward.

Q: What happens if discharge is delayed because of billing?

A: The Discharge Coordination Office keeps the patient informed of the expected timeline and works with the billing desk to resolve outstanding items as quickly as possible.

Q: Does the hospital arrange transport home?

A: No. Patients are responsible for arranging their own transport, though the Discharge Coordination Office can share general information about nearby options.
